

LUND UNIVERSITY

Department of Astronomy and Theoretical Physics

## Registration for Diploma work/project

.....  
(last name, first name, personal number)

is hereby accepted to a degree project at the Department of Astronomy and Theoretical Physics.

Course code, credits, and degree:

| <input type="checkbox"/> ASTX01 | 30 hp | Master of Physics   | <input type="checkbox"/> FYTM03 | 30 hp | Master of Physics   |
|                                 |       |                     | <input type="checkbox"/> FYTM04 | 60 hp | Master of Physics   |

Course load:     full time     part time

Course responsible: .....

Supervisor: .....

Half time meeting planned for: ... will be proposed by course coordinator .....

Final presentation planned for: ... will be proposed by course coordinator .....

Until ..... supervision is guaranteed. Under special circumstances (illness etc), the supervision period can be extended with a new registration form.

### Presentation and course grade

The thesis is presented both at a seminar and in a written report. The final grade (väl godkänd – pass with distinction / godkänd - pass / underkänd – fail) is decided by an examination committee, and is determined by assessing the quality of both the work carried out and the presentation. The following criteria are considered:

- Work effort and time planning
- Independence and commitment  
(inquisitiveness, ability for independent analyses and conclusions, originality)
- Scientific work (quality, interpretation and assesement of results)
- Written report (structure and clarity)
- Oral presentation  
(time planning, structure, communication, ability to answer questions)

The written report should be made available to the committee *at the latest* one week before the oral presentation, and must at that time be approved by the supervisor. Approval of the written report by the supervisor and course responsible is required for the oral presentation.
